

Farther out. More at home.

A field base that arrives in one piece.

For operators who run their days in places with no infrastructure. A 6 x 12 ft towable unit, built in Texas. Tow it in, lift the wall, and the camp has a working center.

Behind a standard pickup

ORYN BISON

One unit. The camp's working center.

A place to come back to.

The view brings people out. The daily routine is what lets them stay. BISON is the working center of the camp. Tents, furniture and sleeping are set up around it.

GALLEY

Sink and faucet, stainless counter and shelving. Outdoor cooking from an external gas quick-connect.

STORAGE

Enclosed storage inside the unit for gear, supplies and equipment. It travels loaded.

POWER

Three pairs of electrical outlets on board. Starlink connectivity available as an option.

SHADE

The long side wall lifts into an awning over the work area.

HOSTED STAYS / THE UNIT AT THE CENTER OF THE CAMP

Concept imagery. Tents and furniture shown for context. Not included with BISON.

WHO RUNS ON IT

Stay close to the work. Live well.

A field base should support both the mission and the people who carry it out.

FIELD CREWS

After a long day on site, the crew has a place to eat, compare notes and reset.

LODGES AND RANCHES

Meals and a working base across open land, without building a kitchen.

ONE UNIT / FOUR STEPS

01

TOW IN

02

LIFT THE WALL

03

SETTLE IN

04

MOVE ON

The unit stays the same. The people, camp and purpose shape what happens around it.

BUILT IN TEXAS

Your place. Your people. Your BISON.

Built by a Texas trailer manufacturer. American suppliers first. We configure each BISON to the operation it serves. Running hunts or fishing trips? See LYNX and PIKE.

HOSPITALITY

Lodges, glamping and guest operators.

EVENTS & PRODUCTION

Event operators and production base camps.

FIELD

Ranch crews and field teams living near their work.

START WITH YOUR OPERATION

Tell us about your operation. We reply within two business days.
