

Deployable field infrastructure for disaster recovery operations.

When basic services are gone, crews still need power, communications, supplies and a hot meal. RATEL is a towable crew-support and supply point, sized so an agency or contractor can own one, park it in the yard, and tow it out the morning the call comes.

● POWER ● STARLINK ● AIR COMPRESSOR ● SUPPLY STORAGE ● HOT MEALS ● 6 X 12 FT

READY TO SUPPORT THE WORK

Power, communications, supplies and hot meals where the work is.

**BISON****RATEL****LYNX****PIKE**

Built for the first days of an incident.

ORYN RATEL is the ORYN platform configured for disaster response: a 6 x 12 ft towable crew-support and supply point that holds the line before a full camp is mobilized, or for the whole run of an incident that never gets big enough for one.

● SUPPLY STORAGE

Enclosed storage inside the unit for supplies, tools and equipment. It stays loaded in the yard and travels ready.

● CONNECTIVITY

Starlink satellite communications on board, for internet and calls where networks are down.

● HOT MEALS

Field galley with sink, stainless counter and shelving. Outdoor cooking from an external gas quick-connect for a full-size flat-top griddle.

● TOWING

6 x 12 ft enclosed unit on a V-frame drawbar with screw jack and caster wheel. Tows behind a standard pickup.

● POWER

Three pairs of electrical outlets for radios, phones, laptops and tools. Full power system being finalized with our build partner.

● AIR

On-board air compressor with an air hose on an automatic retracting reel, for tires, tools and equipment.

● COLD STORAGE

Cold storage equipment for food, drinks and supplies, specified with the unit, American suppliers first.

● STAGED AND READY

Own it, stage it, train with it. Tow it out the morning the call comes.

CONCEPT RENDERING. TENTS AND EQUIPMENT SHOWN FOR CONTEXT.

Arrive. Deploy. Support people. Keep going.

Crew support from arrival through night operations.

Concept renderings. Tents, lighting and furniture shown for context.

SUPPLIES + MEALS

Supplies and tools on board, and hot meals close to the work through long shifts.

POWER + CONNECTIVITY

Charging for radios, phones and laptops at the galley outlets. Starlink satellite communications on board.

REST + RESET

A practical place to sit, eat and recover close to the work.

READY TO MOVE

Close up, hitch and tow to the next site. On-board air for tires and tools.

Tow in > Open > Operate > Move again

No rebuilding the field base from scratch at every location.

HOW TO BUY ORYN units are built and sold by NIMSAS LLC, Austin, Texas.

FEDERAL / SAM.GOV

NIMSAS LLC · UEI LWX9JMHXTKM4. Full SAM registration in progress.

TEXAS / CMBL

NIMSAS LLC is registered on the Texas Centralized Master Bidders List.

CONTRACTORS AND RELIEF ORGS

Direct purchase order with ORYN. Quotes and spec sheets on request.

Put an ORYN RATEL behind the mission.

For organizations rebuilding after hurricanes, floods, wildfires and other major incidents, ORYN provides a reusable field capability that can be staged, trained with and deployed again.

CONTACT

contact@oryn.camp | oryn.camp | We reply within two business days.
